

# Carbon Reduction Plan

Company name: Promatica Digital Ltd

Publication date: 06/01/2025

## Commitment to achieving Net Zero

Promatica Digital Ltd is committed to achieving Net Zero emissions by 2040 which aligns with the NHS's goal of achieving Net Zero by 2040.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

<b>Baseline Year: January 2024 to December 2024</b>	
<b>Additional Details relating to the Baseline Emissions calculations.</b>	
There is no previous reporting prior to creating this initial plan in January 2025 and so the data below is what we have gathered retrospectively for 2024 and will be used as our baseline and reporting year. The next full reporting year will be 2025 and this will be reported as our current emissions reporting in January 2026.	
<b>Baseline year emissions:</b>	
<b>EMISSIONS</b>	<b>TOTAL (tCO<sub>2</sub>e)</b>
<b>Scope 1</b>	<b>0 - We are a 100% remote based company who lease no permanent office space</b>
<b>Scope 2</b>	<b>0 - We are a 100% remote based company who lease no permanent office space</b>
<b>Scope 3 (Included Sources)</b>	<b>4.3 From homemaker energy emissions, train, petrol and additional goods and services such as Azure Cloud Hosting</b>
<b>Total Emissions</b>	<b>4.3</b>

## Current Emissions Reporting

Reporting Year: Ending December 2024	
EMISSIONS	TOTAL (tCO <sub>2</sub> e)
Scope 1	<b>0 - We are a 100% remote based company who lease no permanent office space</b>
Scope 2	<b>0 - We are a 100% remote based company who lease no permanent office space</b>
Scope 3 (Included Sources)	<b>4.3 From homeworker energy emissions, train, petrol and additional goods and services such as Azure Cloud Hosting</b>
<b>Total Emissions</b>	<b>4.3</b>

## Carbon Reduction Projects

### Completed Carbon Reduction Initiatives

We have already migrated to a 100% paperless and remote office which reduces our scope 1 and 2 equivalents to near zero.

The following environmental management measures and projects will be considered following the 2024 baseline. The carbon emission reduction achieved by these schemes could equate to 0.4 tCO<sub>2</sub>e, a **9% reduction** against the 2024 baseline.

In the future we hope to implement further measures such as:

1. Moving 100% of our homeworking staff to using 100% renewable energy in their homes. This would reduce our emissions by 9% and a total of 0.4 tCO<sub>2</sub>e. This can be achieved quickly and cheaply by simply choosing an alternative energy provider, such as Octopus Energy. 50% of our staff already get energy from renewable sources, but we could do more.
2. Encouraging more train travel or reducing travel even more.

## Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>1</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>2</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard<sup>3</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of Promatica Digital Ltd:

Alex Buckland – Product Director
